Part I Preface

Thank you for using the registration management system for overseas manufacturers of imported food. This user manual is intended to enable you to use this system proficiently as soon as possible.

The manual is designed to be comprehensive and easy to understand. You will find in this manual information on installation procedures, system configuration, basic operation, hardware and software use and safety precautions. Please read it carefully when installing and using the system for the first time as it will help you to get the most out of the system.

This manual is intended for users with elementary computer knowledge. Here we assume that you are familiar with WINDOWS7/10 and know how to use the mouse and browsers, such as Google Chrome.

This manual is mainly composed of three parts:

Part II: Instructions for Use

This part is an introduction to the basic operations of the system, including basic operation instructions, login and logout, interface introduction, applicable environment, and others.

Part III: Introduction to the System

This part includes introduction to the system and definitions of terms.

Part IV and Part V: Business Operation Descriptions

These two sessions include a brief introduction to the main functions of the system, including enterprise user registration, product registration application

and others.

While the information in this manual has been verified to the best of our abilities, we cannot guarantee that there are no mistakes or errors.

All data shown in this manual is test data.

Part II Instructions for Use

2.1 Web Portal

The system is web-based and can be accessed via [https:// cifer.singlewindow.cn](https://cifer.singlewindow.cn)

2.2 System Environments

2.2.1 Operating System

Windows 7 or 10 (either 32-bit or 64-bit operating system).

Windows XP is not recommended.

2.2.2 Browser

Chrome 50 and above

2.3 Requirements on Entry

2.3.1 Requirements on Entry

In the interface, all fields with * are mandatory, and fields without * are optional.

Fields with the background color of grey are not available. If a red alert pops up next to a field when inputting, it indicates that the information currently entered does not meet the requirements and should be modified according to the alert. The blue buttons in the interface are function keys.

Basic Information of Enterprise	Relevant Information on Production	Declaration by Enterprise	Attachment Information

Figure: Basic Information Entry of Enterprise (Local)

2.3.2 Keyboard Operations

Some functions in the interface can be operated quickly by the keyboard.

Pressing **Tab** allows navigating to the next field or text box for entry.

Pressing the **Up** or **Down Arrow** key allows you to select from the parameters in the drop-down menu on the interface.

Pressing **Backspace** allows deleting the content in the current field.

2.4 General Functions

2.4.1 Switch Tabs

If there are many open tabs, you can switch between tabs by clicking the interface icon  or .

2.4.2 Collapse/Expand the Menu

Click the  icon in the upper left corner of the right display area to collapse or expand the menu bar on the left side. The folded left menu bar displays icons only, as shown in the following picture.

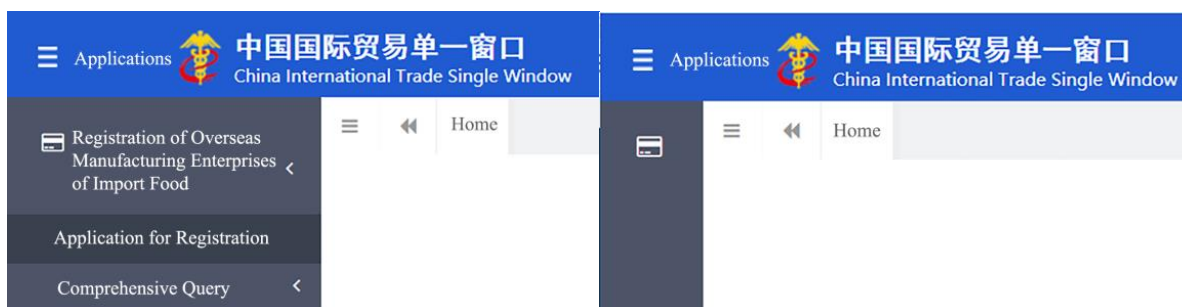

Figure: Comparison of Menu Bar before and after Collapsing

2.4.3 Close the Tab

Click the icon **Closing Operation** ▼ (in the upper right corner) of the right display area to bring up the drop-down menu (as shown below). Selecting “Close all tabs” will close all web tabs opened in the current display area. If you select “Close other tabs”, you will close all open tabs except for the currently displayed tab.

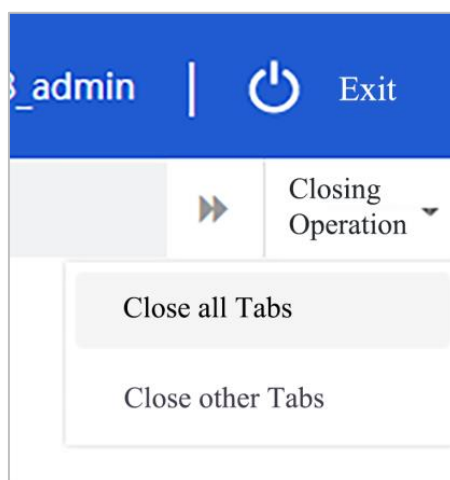

Figure Operation of Closing the Tab

2.5 Log in or Log out of the System

Visit <https://cifer.singlewindow.cn>, then enter the user name and password to log in to the system, and enter the main interface of the system.

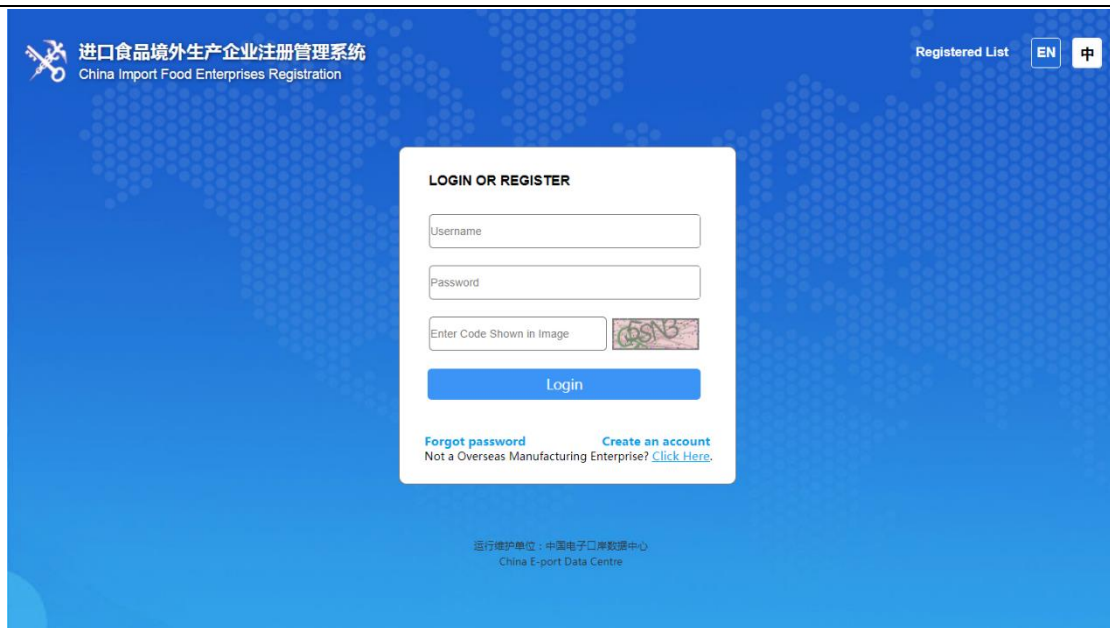

Figure System Login

This system is available for overseas enterprise users and overseas competent authorities users. You can safely exit the system by clicking [Exit] in the upper right corner of the interface after entering the system.

Part III Introduction to the System

3.1 Users

Competent authority of the country/region where the enterprise is located (hereinafter referred to as “competent authority”): the official department responsible for safety and health supervision of food manufactures in the country/region where the overseas manufacturers of imported food are located. Through the system, competent authority shall review and inspect the applications submitted by the local manufactures through the system and recommend them to the General Administration of Customs of the People’s Republic of China (hereinafter referred to as the “GACC”). The competent authority shall administer the registered enterprises recommended by it and cooperate with the GACC to conduct recheck and rectification of registered

enterprises.

Overseas manufacturers of imported food (hereinafter referred to as “enterprises”): overseas manufacturers, processors and storage facilities that export food to China. Enterprises submit applications for enterprise registration, modification, renewal and cancellation, submit rectification materials and receive notifications from GACC through the system.

3.2 Function

China Import Food Enterprise Registration Management System aims to administer the registration of overseas manufactures of imported food, including applications for registration, alteration, renewal, and cancellation of overseas manufactures, and queries on applications. It also enables the competent authority to conduct review and inspection the registration applications submitted by enterprises, as well as the administration on registered manufactures.

The registration methods for overseas manufacturer of imported food include recommendation for registration by the competent authorities of the countries or regions where they are located and application for registration by enterprises. Overseas manufacturers of 18 categories of imported food must be recommended by the competent authority of the country/region where they are located for registration with GACC: meat and meat products, casings, aquatic products, dairy products, bird’s nests and bird’s nest products, bee products, eggs and egg products, edible oils and fats, oilseeds, stuffed pastry products, edible grains, milled grain industry products and malt, fresh and dehydrated

vegetables, dried beans, condiments, nuts and seeds, dried fruits, unroasted coffee and cocoa beans, foods for special dietary purposes, and functional foods.

Overseas manufacturers of imported food other than the 18 product groups listed above shall apply for registration directly with GACC.

Figure: Registration Process

Part IV Enterprise Account Management

Depending on whether the enterprise needs to be “recommended by the competent authority for registration of the country/region where it is located”, the account for overseas enterprise users to access the system can be obtained either through the assignment of the competent authority or the self-application of overseas enterprise.

The system account assigned by the competent authority can be used to register an overseas manufacturer of any categories of food after logging in to the system.

The system account applied by the overseas enterprise can only be used to register an overseas manufacturer of imported food products that do not fall into one of the “18 categories”.

Figure Procedure for Enterprise Registration Application

4.1 Create New Account

Visit <https://cifer.singlewindow.cn>, and enter the login page:

Figure Chinese/English Login Box

After logging in to the system with user name and password, click on [Enterprise Account Management]- [Create New Account] on the left menu.

Figure Create New Account

After filling the user name, password, workplace and registration number in the

country (region), click on [Submit]. A popup notification will appear indicating successful registration and the user registration is complete. Click on [Add] in the upper left corner to clear the entry form and enter the information of a new enterprise account.

4.2 Account Maintenance

Click on [Enterprise Account management] - [Account maintenance] on the left, and the management page will be displayed on the right. A certified enterprise account can be found by providing the enterprise name or a registration number. All accounts queries are initialized upon entering.

Tips: For an enterprise that is **imported into** the registration system, the account name is its **registration number in China**, and the password is randomly generated, which can be obtained by the enterprise from its overseas competent authority of the country/region. The account and password generated automatically can be changed through Enterprise Account Management after logging in to the system.

4.3 Confirmation of Account Certification

An account registered by an enterprise itself can be used for registration of 18 categories of products after being certified by the competent authority. (See Part III 3.2 Function Introduction for more information). Certification can be classified into certification applied by enterprises and certification actively done by competent authorities.

This function can be used to approve the certification application submitted via enterprise account certification function, and the account can be used for registration of 18 categories of products after being approved.

Click on [Enterprise Account Management] - [Account Certification Confirmation] on the left, and the account query page will be displayed on the right. By default, all the account certification applications to be certified by the organization will be found, or the enterprise name or the registration number can be used to query the uncertified enterprise account.

Figure Interface for Pending Enterprise Application Query

When the application status is "Submit to authorities", "Authorities temporary saved" and "To be corrected by authorities", the competent authority can edit and modify the application, make recommendations, request supplementation and correction (enterprise), and refuse to recommend (enterprise). In other status, only viewing operation can be performed.

When the status of cancellation application is "Submit to authorities", the competent authority can cancel (submitted to GACC) and return.

Note: Please refer to the appendix at the end of the manual for detailed explanations of each status.

5.1 Introduction to Procedure (Infant Formula as an Example)

1. In the query list, select the data “Submit to authorities” and click on [View].
The document status is listed at the top. If you choose to view the change application, the submitted cancellation application is also available for the

same product of the enterprise, the prompt “current status not operable” will pop up.

3. Cancellation: Submit the application data for cancellation by the enterprise to the GACC for approval.

4. Refuse: The application data for registration/cancellation by enterprise is sent back to the enterprise. The enterprise **is not allowed to modify** the data for a second submission.

5.3 Introduction to Procedure for Renewal Application

1. In the query list, select the data that has been submitted to the competent authority and click on [View]. The document status is listed at the top. The relevant attachments of the “Declaration for the extension of registration of manufacturer” must be uploaded.

second submission.

Chapter 6 Cancellation of Enterprise Registered

This module provides the function for a competent authority to initiate cancellation procedure of enterprises that have been approved for registration and had registration number in China under its jurisdiction.

Overseas authorities log into the system, click on the menu of enterprise registration and cancellation account, and inquiry about the registration application that can be canceled by product category, enterprise name and registration number of the country.

Kind reminder: If the enterprise has an in-transit application for modification at this time, it can also initiate cancellation.

(I) When the application for cancellation is approved, if the in-transit application for modification is at the competent authority, the competent authority can only return it (the enterprise cannot edit it). If it is at the Customs, the result of Customs modification approval will only affect the content of the application for modification, but will not affect the result of cancellation approval. That is, the result of approval for modification can only affect whether the data of the product application for modification will be updated, but will not affect the cancelled status of the product's qualification to be exported to China.

(II) When the application for cancellation is not approved by GACC, the in-transit application for modification will not be affected and subsequent business can be continued.

by GACC to the enterprises under its jurisdiction (the notification will be sent to the competent authorities of the country and the enterprises with the corresponding registration qualifications for exporting to China), including import suspension notification, import resumption notification, revocation notification and cancellation notification. The enterprises that receive the notification will have an impact on the registration number of the products involved in the notification in China.

Suspension of import, the corresponding registration number in China will be suspended, and the corresponding goods will not be cleared through Customs. The corresponding registration application cannot be changed, continued or canceled.

Resumption of import, the corresponding registration number in China will return to normal, and the corresponding registration application can be changed, continued and canceled.

Revoked, if the registration number of the corresponding product in China is invalid, the enterprise must apply for registration again.

Canceled, if the registration number of the corresponding product in China is invalid, the enterprise must apply for registration again.

Click the menu "Notification" on the left to enter the notification page. (See the figure below)

Notice Concerning Revoking of Manufacture Registration to the General Administration of Customs of the People's Republic of China (GACC)

wdtest086 :
Due to the failure of ensuring the food export to China conforms with safety and sanitation requirements, according to the Article 24 of Regulations of the People's Republic of China on the Registration and Administration of Overseas Manufacturers of Imported Food, GACC has revoked the registration number of CUSA03012205250002 for the manufacturer for export to China on 2022/05/28. China customs will not accept import declaration of food from the aforementioned manufacturer for export to China from the departure date after the date of revoking.

Chapter 8 Rectification

The rectification procedure can only be initiated by GACC. The enterprise and the competent authority are required to cooperate and submit relevant materials for rectification. The rectification registered by the enterprise is only for one registration number in China under the name of the enterprise, but not for the whole enterprise. If the competent authorities and enterprises fail to finish rectification within the prescribed time limit, the rectification shall be deemed to be unqualified.

Click the “Rectification” menu on the left to view the rectification information registered by the enterprise.

Figure: Rectification Details Page

The function buttons “Send to Enterprise” and “Submit” are set at the bottom of the interface of rectification details. The competent authority can send the rectification information to the enterprise by clicking on “Send to Enterprise”, and submit the rectification materials to GACC by clicking on “Submit”.

The enterprise shall submit the rectification materials to the competent authority, and then the competent authority shall implement review and inspection, and may modify the rectification materials submitted by the enterprise. If the materials submitted by the enterprise are deemed to meet the requirements,

they shall be submitted to China Customs for review and approval. If the materials submitted by the enterprise fail to meet the requirements, they may be returned to the enterprise for supplementation and correction. The enterprise shall be allowed to submit the rectification materials to the competent authority after supplementation and correction.

The competent authorities can submit rectification materials in the name of enterprise to GACC for approval. After the rectification is approved, the intranet will initiate the procedure of import resumption. If the rectification is not approved, the application forms will be returned to the competent authority in the status of supplementation and correction and GACC approval not granted. In terms of supplementation and correction, the competent authorities are allowed to correct the rectification materials and submit them again to GACC for approval. In terms of GACC approval not granted, the competent authorities are not allowed to modify or delete the original rectification notification.

Chapter 9 Reexamination

The review process is initiated by China Customs and is divided into two

situations. In one situation, it requires that the enterprise shall cooperate and submit certain materials to support the review. In the other situation, the enterprise is reviewed but does not need to cooperate with the submission of any materials. The review process of enterprise registration is only for products registered in China under the name of the enterprise, but not for the whole enterprise. If the competent authority and enterprise fail to complete the review process within the specified time limit, the review shall be deemed as unqualified. There is no need for the enterprise to submit the review notice of the materials, and China Customs will not set a time limit.

Click the “Reexamination” menu on the left to view the reexamination information of enterprise registration. The reexamination information of status to be processed is queried by default.
